The Vulkan Technic Pneumatic Presser Series SGA 350 is a structural glazing tool designed for use with 3M™ VHB™ Structural Glazing Tapes. This tool applies a controlled pressure to the glazed unit to facilitate good contact of the 3M™ VHB™ Structural Glazing Tape adhesive onto the glass and glazing frame. The pressure wheels are adjustable allowing the tool to be used on glazing profiles up to 10.6" (270 mm) in depth.

The Vulkan Technic Pneumatic Presser Series SGA 350 tool is available from Vulkan Technic at the address listed above. Please visit www.vulkantechnic.com for information on this and other structural glazing tools designed specifically for use with 3M™ VHB™ Structural Glazing Tapes.

### Vulkan Pneumatic Presser Series SGA 350

**Tool Features:**

- Robust design.
- Pressure wheels are adjustable in the X-direction to accommodate different glazing profile configurations.
- Adjustable clamping width - see table
- Pressure applied via pneumatically controlled cylinder with adjustable pressure regulator.
- Precision ball-bearing wheels with a durable urethane surface which will not mar or damage glass or glazing profile.
