Kimberly-Clark KIMTECH® WETTASK® Wipers add to 3M™ VHB™ Tape’s value proposition of “fast and easy.” A case of wipers contains one (1) bucket and 6 rolls of wipes. Slowly pour 32 oz. to 40 oz. of isopropyl alcohol and water solution (IPA/water, 70% IPA) onto the towel “ring” to allow it to soak into the wipes. There should be no free liquid in the bottom of the pail. Pull the towels from the center of the roll through the opening at the top and snap the cover into place. The small snap cover can be left open during the production but closed when not being used. 3M 471 Vinyl Tape can be used to seal the snap cover to the pail minimizing evaporation at this connection.
